

Colonel Werner is a Division Head at the NATO Joint Force Training Centre (JFTC) in Bydgoszcz, Poland, responsible for support to the NATO Warfare Development program as well as for IT and M&S support to NATO Command Post Exercises.

Colonel Werner is also responsible for the development of a new JFTC wargaming capability. The aim is to develop a tool to support the testing and refinement of current military real-world tactical-level operational plans by conducting a computer-assisted wargame with the respective NATO HQs responsible for the deterrence and (if required) defense of our countries at the eastern flank of NATO.

Colonel Werner is a Cavalry Officer by nature and has a wide range of operational experience from various levels from the lowest unit level up to the German Ministry of Defense, NATO Multinational Corps Northeast (MNC NE) in Poland and several operational missions to the Balkans and Afghanistan. On top of his own wide operational background, he has been in charge for several NATO Computer Assisted Exercises at MNC NE for 5 years and builds on this experience in his current position at NATO JFTC.

COL Olaf Werner holds a university degree (Dipl-Ing) in Aerospace Engineering from the University of German Armed Forces in Munich, continued his studies at the German Command and General Staff College in Hamburg and during his Post-Graduate Operational-Strategic Studies at the Polish National Defense University.
