

Colonel George Cushman V - Branch Head – Modelling and Simulation/Learning Technologies - NATO HQ SACT

Colonel George H. Cushman V is the Branch Head of the Modelling & Simulation / Learning Technology Branch at NATO Headquarters Supreme Allied Command Transformation (HQ SACT). A U.S. Army officer with 22 years of active-duty service—originally branched Armor and currently a Functional Area 57 (Simulation Operations) with 11 years in the M&S field leading teams from small units to large, multinational, geographically distributed organizations and has planned and executed multinational, multi-echelon exercises from tactical through strategic levels. His work focuses on turning interoperability from a technical aspiration into operational reality by bridging communication between engineers and end users and applying practical solutions to procedural, cultural, and information-system seams. He holds a BSc. in Psychology from the Virginia Military Institute, an MSc. in Learning Design and Technology from the university of Maryland Global Campus, and is current a NATO Professional Doctorate Fellow with a Focus on Technical Interoperability. His Professional Military Education includes Command and General Staff College, and the Army Defense Strategy Course, NATO Exercise Planning Course, Army Knowledge Management Qualification Course, USAWC Wargame Design Course, and Army instructor and FA57 Simulation Operations training programs.
