

Sébastien Lozé is Director of Market Innovation and Ecosystems at Aechelon, a Shield AI company. He has more than 20 years of experience in defense and aerospace simulation, with previous leadership roles at CAE, Presagis, Epic Games, and Bohemia.

His work focuses on high-fidelity simulation, synthetic environments, interoperability, and the convergence of technologies used to train human operators and autonomous systems. He contributes actively to the international modeling and simulation community through organizations including SISO, NTSA, NATO NMSG, OGC, and USGIF.

Sébastien holds a degree in computer engineering and has earned the NTSA Certified Modeling & Simulation Professional (CMSP) master level recognizing his expertise and contribution to the modeling and simulation profession.
