

Pablo Hermoso Moreno - Senior Solutions Architect at NVIDIA

Pablo Hermoso Moreno is a Senior Solutions Architect at NVIDIA, working on AI for Physical Simulation and Agentic AI for Engineering. Including surrogate modelling, design optimisation and CAE workflows. He graduated in aerospace engineering from Imperial College London and completed his master's thesis at Caltech on physics-informed machine learning. He was previously an aerodynamics engineer at the Mercedes Formula One team, and a senior data scientist at AWS delivering AI and machine learning solutions for large enterprises.
