COMMON CHALLENGES

1. LIMITED TRAINING TIME / RAPIDLY CHANGING TRAINING CONTENT
2. LIMITED RESOURCES: BUDGET, TRAINERS, TRAINING FACILITIES
3. TIME PRESSURE

4 SKILLS

Running, swimming, climbing, survival techniques, first aid, drone operation, radio communication, satellite communication, map reading, GPS navigation, weapon knowledge, firearms handling, close combat, self-defense, basic cybersecurity, operation of robotic systems, AI-assisted decision-making, driving (off-road vehicles, armored vehicles), basic knowledge of aerial platforms, diving, explosive recognition, engineering rescue, firefighting techniques, urban and building combat knowledge, camouflage, surveillance, intelligence data analysis, counter-drone systems operation, night vision and thermal imaging equipment use, basic knowledge of air defense systems, foreign language proficiency, psychological resilience, teamwork, leadership skills, strategic thinking, stress management, rapid decision-making, precision shooting, communication protocols, logistics knowledge, operation of energy supply systems, sensor data interpretation, basic medical care, support of humanitarian operations, environmental protection knowledge, drone swarm control, data security, remote sensing, chemical and biological protection, training in artificial environments (VR/MR), tolerance to cold and heat, endurance, accuracy, self-discipline.

CANDIDATES

LIMITED SOURCES (BUDGET, FACILITY AND HR)

Quality vs. Quantity

PRO - HIGH TECH

PILOT - SPECIAL FORCES etc..

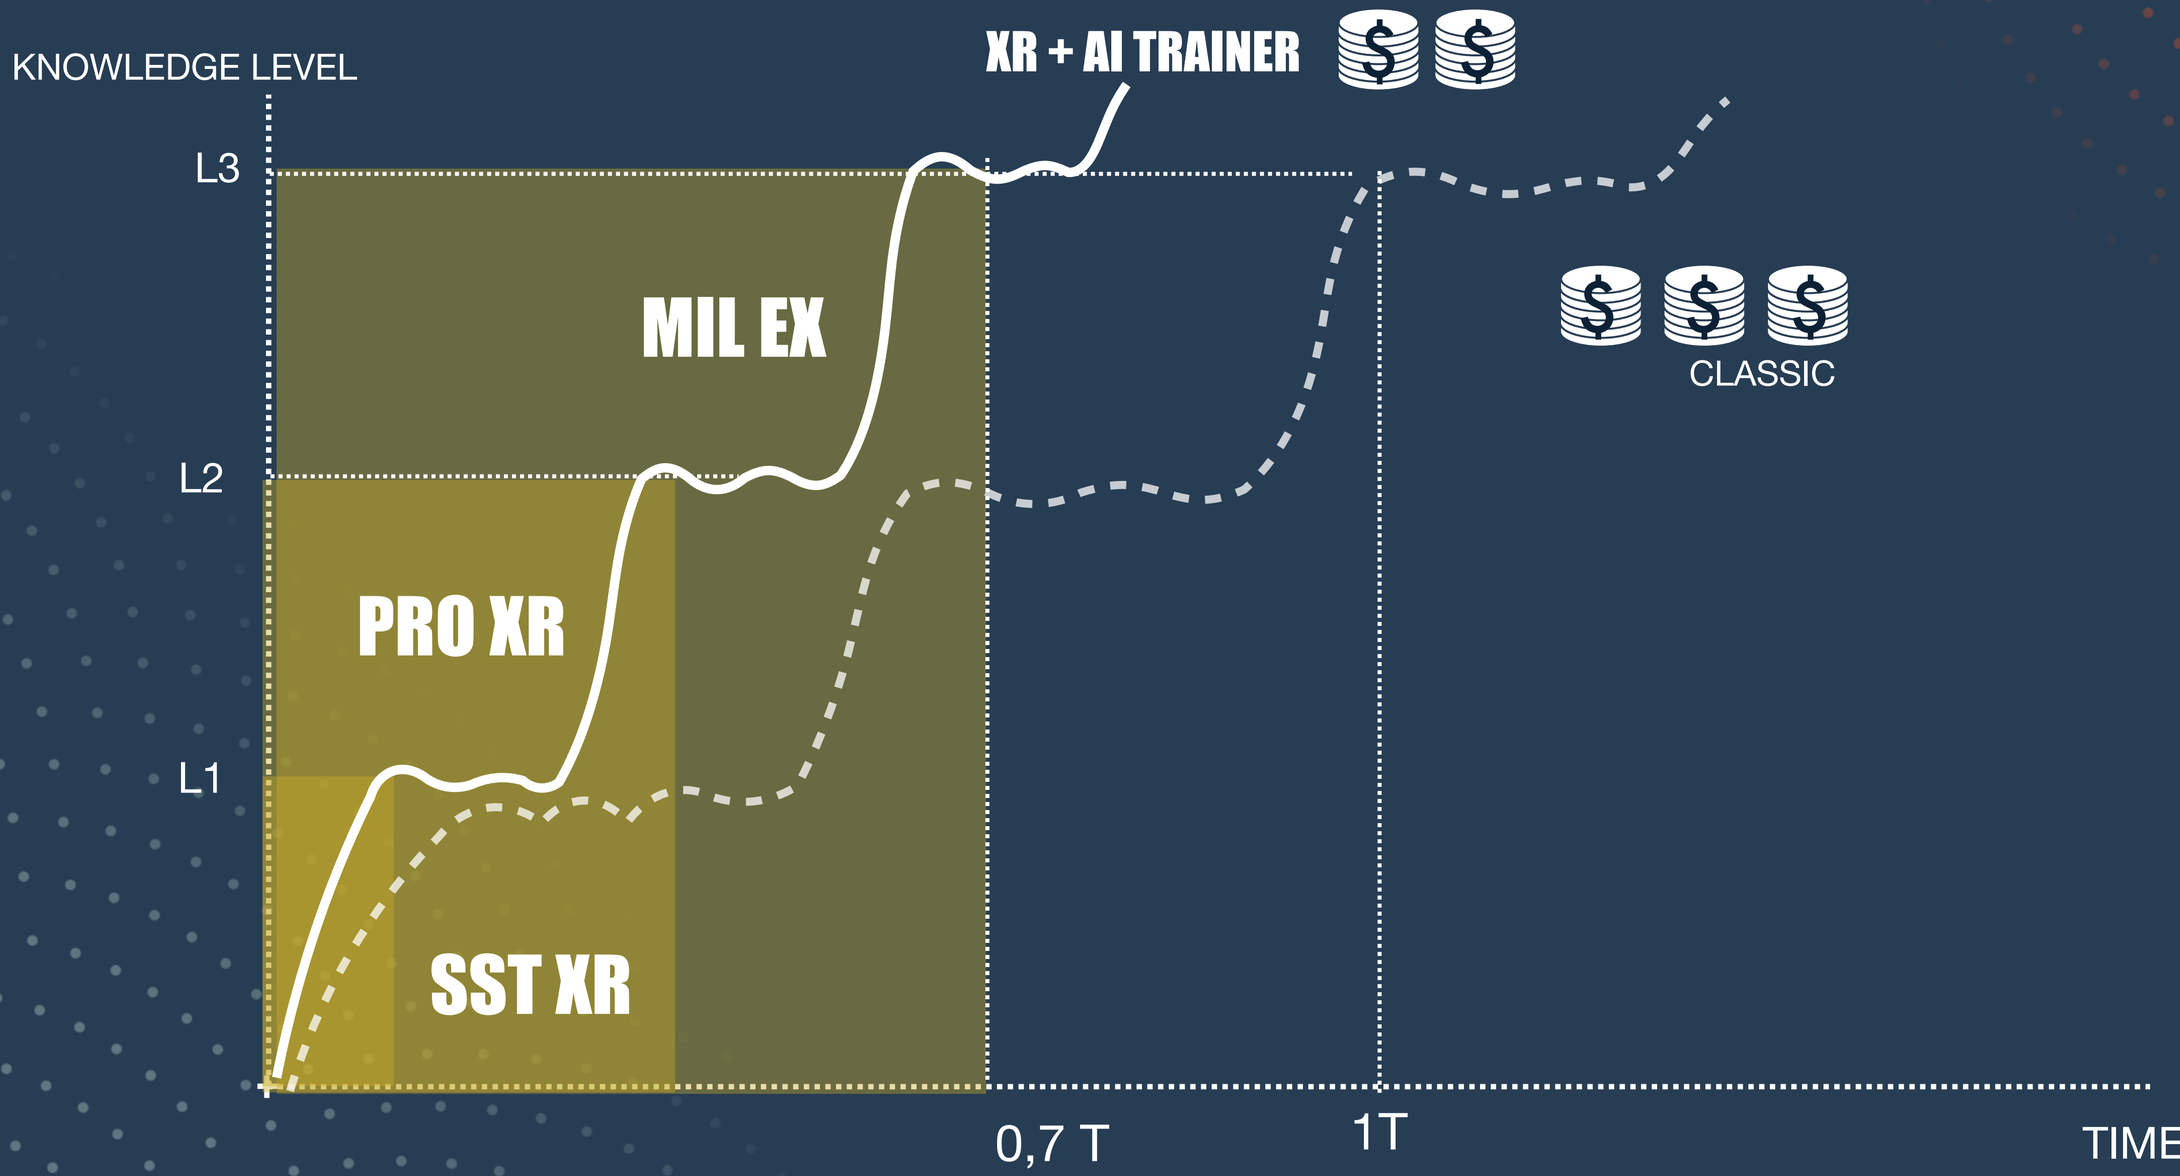

SST - SIMPLE SMART TECH (MOTS, COTS)

TERITORIAL FORCES, HOME D. FORCES, SOCIAL FORCES

2. ADAPTIVE TRAINING
3. PRESELECTION

Tested 482 in 2025 and ‘ll 1200 in 2026/27

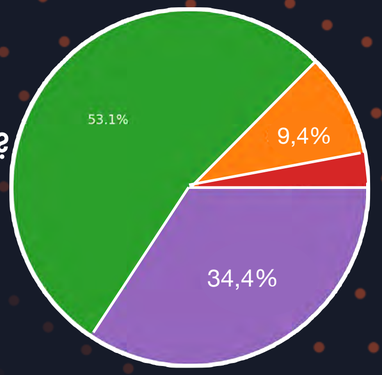

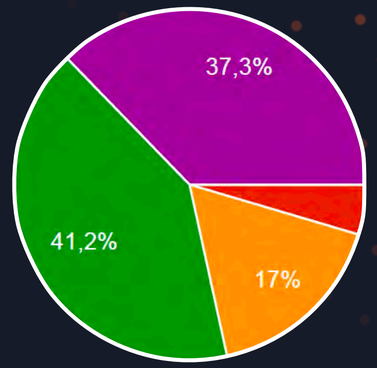

In your opinion, how usable is the SST VR simulator for training/education purposes?

- I believe it is already usableIg
- Yes, with minor improvements
- It still needs significant development
- Not usable at all

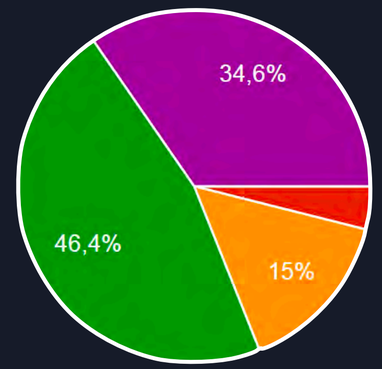

How quickly were you able to learn the basic functions of the platform?

- Very quickly
- Quickly
- At an average pace
- Slower than expected

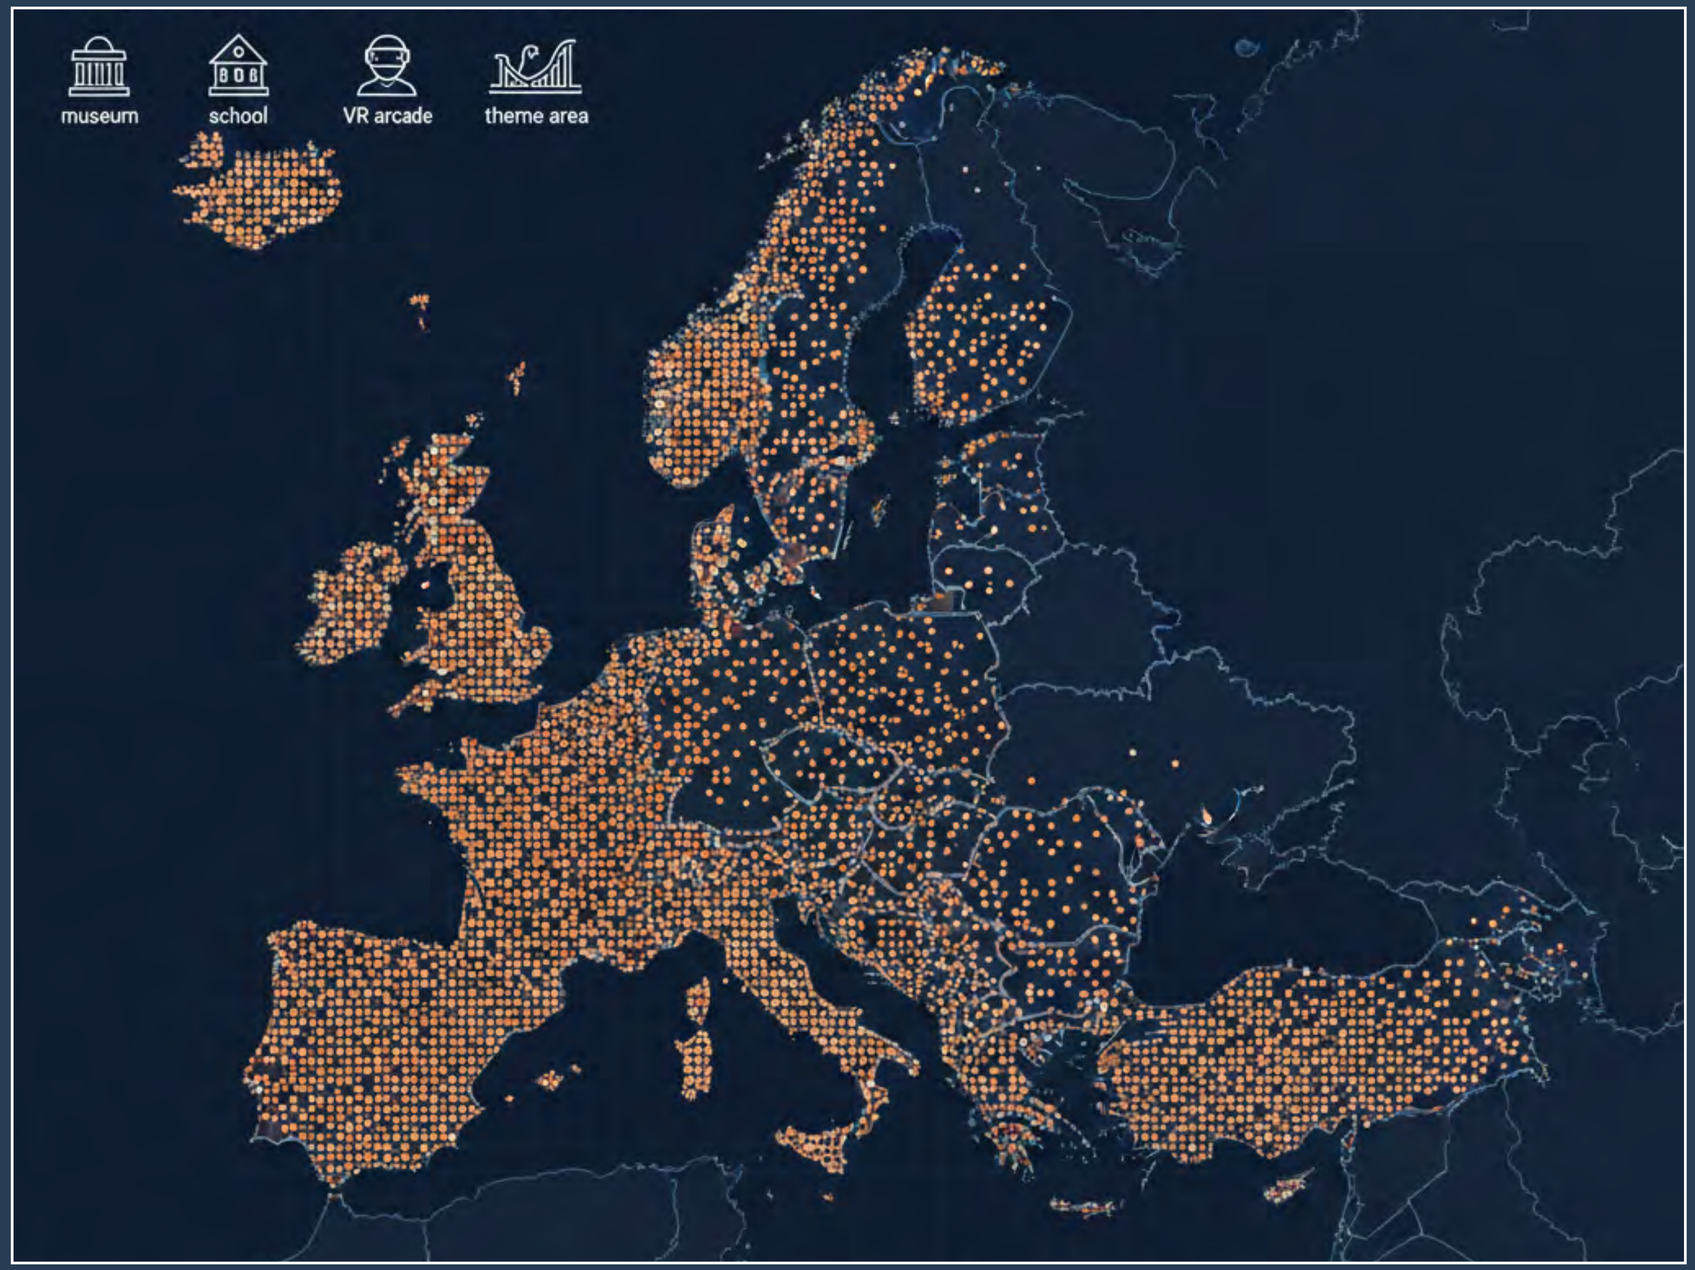

How would you rate the visual appearance of the SST VR Platform?

- Very appealing
- Rather appealing
- Neutral
- Rather unappealing
- Not appealing at all

NATO - EU
XR APP POOL

EUROPEAN DEFENCE AGENCY - MARS AHWG

Support the implementation of the Priority Implementation Roadmap (PIR) Future Soldier Systems by leveraging modern simulation technologies (VR/AR, AI, Digital Twins, gaming-based training) to prepare and initiate concrete multinational capability development projects.

1 MAP EXISTING NATIONAL SIMULATION CAPABILITIES CONCEPT FOR XR-BASED MASS TRAINING OF SOLDIERS

Develop a common concept for using XR and simulation technologies to rapidly train large numbers of soldiers in basic combat skills.

2 ESTABLISH A SHARED SIMULATION CONTENT LIBRARY

Create a common digital repository for simulation-based training content, scenarios, best practices and lessons learned.

3 PREPARE A JOINT EU SIMULATION TRAINING PLATFORM

Develop a business case and roadmap for a future multinational simulation training platform and joint procurement initiative.

4 CONNECT WITH ONGOING EU AND NATO PROGRAMS

Leverage synergies with EU stakeholders and ensure cooperation with Third Parties and NATO.

EUROPEAN DEFENCE AGENCY

TO INFINITY AND BEYOND!
